

## Shopping Centres

Area Measurement

Plowman Craven's property measurement team has been involved in all stages of a shopping centre development and asset management — from initial boundary surveys and rights of light through to Gross Internal Areas for construction targets.

Tenant Packs which provide various information, ranging from Net Internal Areas, Zone A, lease Plans and Elevations have been key in the efficient management of retail units and occupier relations.

Having accurate available information enhances the running of a Shopping Centre, whether it is mall survey for flooring, kiosk location or full floor plans to assist refurbishment or alternations.
