

Lancaster Castle is one of the best-preserved and hardest-working Castles in the country. It is owned by Her Majesty the Queen, who is the 'Duke of Lancaster'. As well as being a fortification the Castle is also one of Europe's longest serving operational prisons.

To assist the Lancaster Castle restoration project, Plowman Craven were commissioned to carry out a measured survey of the external elevations of the castle walls. We utilised 3D scanning technology aligned with terrestrial photography using Hasselblad cameras.

2D rectified elevations and linework elevations were the main deliverable to our client.
