Plowman Craven

Sheds

Britain's way of doing business has been changing dramatically, not least in where it now chooses to base itself.

The printing presses have gone from Fleet Street, industrial and distribution warehouses have moved from the inner suburbs to business parks convenient to the motorway network.

What was once labelled transport now calls itself the logistics industry and works from ever-bigger brownfield distribution sites while retailing has seen the High Street losing ground to out-of-town shopping malls and retail parks.

This mass migration of businesses has created a strong demand for accurate measurement information – and it has to be produced at double quick time, which is where Plowman Craven comes in.

Currently employing around 150 highly skilled staff and rising, **Plowman Craven is Europe's leading geomatics company**, counting many of the nation's cornerstone businesses among its clients.

With more than 40 years of solid experience and backed by the latest **3D digital laser scanning technology** to go alongside conventional surveying techniques when required, Plowman Craven is expert in the **RICS code of**

measuring practice, with members on the committee.

Providing its services for developers, architects, investors, owner-occupiers, landlords, tenants, service providers, designers and agents, Plowman Craven is an independent company, totally free of bias and can therefore provide

assignable 'duty of care' through its highly accurate lease plans.

Meeting customer needs and developing solid relationships is a number-one priority in a business where promise fulfilment is all-important.

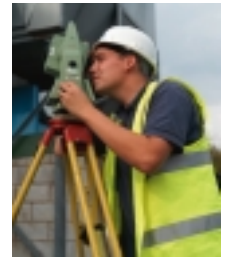

Experts in assessing gross internal measurements, Plowman Craven's property services team is geared to work on everything from single unit warehouses or industrial buildings to the

largest retail, leisure and industrial parks and is well versed in working on large portfolios where it is important for clients and their logistics teams to have accurate information constantly at their fingertips on the number, type and precise size of properties they operate.

Also active in the retail, office and other areas, Plowman Craven shows its commitment to this sector through its active participation in the annual Sheds conference.

As part of their data gathering skills, Plowman Craven can, if required, collate further information about the site to facilitate efficient estate management.

The company has its own facilities management system or can import data directly onto the client's own systems.
