

VISUALISATION

Interactive Platforms

Plowman Craven can re-use models created for CGI's, animations or we can convert your existing 3D models to run on an interactive real-time platform.

This gives a user a totally immersive experience, with the ability to navigate and control movements themselves through the scenes:

- Switch between existing and proposed designs, or modifying elements of the design
- Movement control allows the user to view the design from any angle – not a fixed path like an animation
- Create interactive training simulations using accurate data
- Look through different fixed camera angles or viewpoints
- Trigger actions when users interact with objects within the immersive environment – i.e. playing informative sound clips or showing historic documents

These interactive deliverables can be created in a number of different formats, allowing for distribution over the web, desktop or tablet devices.

The multitude of different interactivity options can be developed depending on your requirements.

About Plowman Craven

Plowman Craven is an innovative surveying company and a trusted name which offers a broad range of measurement services across numerous and diverse markets. Operating worldwide, our highly skilled and motivated team make a difference by providing timely, collaborative and accurate solutions to meet your requirements.

the trusted name in measurement
