

CAPABILITY STATEMENT

Land Quality and Contaminated Land Assessment Services

Plowman Craven's in-house environmental team provides a comprehensive set of Land Quality and Contaminated Land Assessment services across key sectors, ranging from desktop studies to intrusive ground investigations, remediation and environmental monitoring.

Land quality issues carry significant engineering and environmental liability for all stakeholders either acquiring, developing or disposing of a site. We help you identify and minimise land quality risks and maximise the potential for your sites, providing support at every stage of a project's lifecycle from feasibility and pre-acquisition through to design, planning, construction and end use.

Services

We provide a range of Land Quality and Contaminated Land Assessment services including contaminated land risk assessment, consultancy and environmental monitoring with particular experience in brownfield redevelopment and the construction sector.

Key service offerings include:

- Feasibility studies and site appraisal
- Environmental due diligence
- Phase 1 desktop studies
- Phase 2 ground investigations
- Contaminated land risk assessment
- Remediation and verification
- Environmental monitoring
- Material and waste soil management
- Environmental Impact Assessment
- Planning support and regulator consultation

An Expert Team

Our experts have a long and successful track record in the environmental industry, having held senior positions in some of the UK's largest consultancies.

This experience and expert knowledge mean we are ideally placed to minimise land quality risks and maximise opportunities at every project stage.

We utilise both our in-house team and a network of trusted strategic partners, meaning we can flex to the requirements of any project.

An integrated Approach

Our Land Quality and Contaminated Land Assessment services are integrated with our broader Environmental Planning, Surveying and Measurement services throughout the project lifecycle. This integrated approach saves valuable time and creates efficiencies in our delivery, leading to significant cost-savings.

Innovation tailored to your needs

Over the last 50 years, Plowman Craven has built a reputation for innovation. We utilise the tools and technology developed in the business to add value to our environmental services – including tools to manage and present environmental data in a BIM environment.

About Plowman Craven

Plowman Craven provides integrated measurement and consultancy services to the property and infrastructure markets, pioneering the use of technical innovation to deliver proven expertise and trusted results throughout the project lifecycle.
